## **Animal and Plant Health Inspection Service**

*TITLE:* National Animal Health Monitoring System; Cervid 2014 Study

*OMB CONTROL NUMBER:* 0579-NEW

*SUMMARY OF COLLECTION:* Collection and dissemination of animal health data and information is mandated by 7 U.S.C. 391, the Animal Industry Act of 1884, which established the precursor of the Animal and Plant Health Inspection Service (APHIS), Veterinary Services (VS), the Bureau of Animal Industry. Legal requirements for examining and reporting on animal disease control methods were further mandated by 7 U.S.C. § 8308 of the Animal Health Protection Act, “Detection, Control, and Eradication of Diseases and Pests,” May 13, 2002. The National Animal Health Monitoring System (NAHMS’) will initiate the first national data collection for cervids through the Cervid 2014 study, focusing on cervid operations. The study is designed to fulfill a critical gap in NAHMS’ knowledge of the cervid industry.

*NEED AND USE OF THE INFORMATION:* APHIS will use the data collected to: (1) Establish national statistics on management and marketing for producers, veterinary, and industry references; (2) Address emerging issues for cervid operations; (3) Plan for response to animal disease events by better understanding the needs and management practices of cervid operations; and (4) Provide input into the design of surveillance systems for specific diseases. If this type of information is not collected, the U.S.’ ability to predict likely disease spread scenarios and detect trends in management, production, and health status on cervid operations would be limited.

*DESCRIPTION OF RESPONDENTS:* Farms; Individual or households; Business or other for-profit

*NUMBER OF RESPONDENTS:* 3,000

*FREQUENCY OF RESPONSES:* Reporting: Other: One time

*TOTAL BURDEN HOURS:* 990
